

SAMPLE DECK · A TOUR OF WORKBENCH

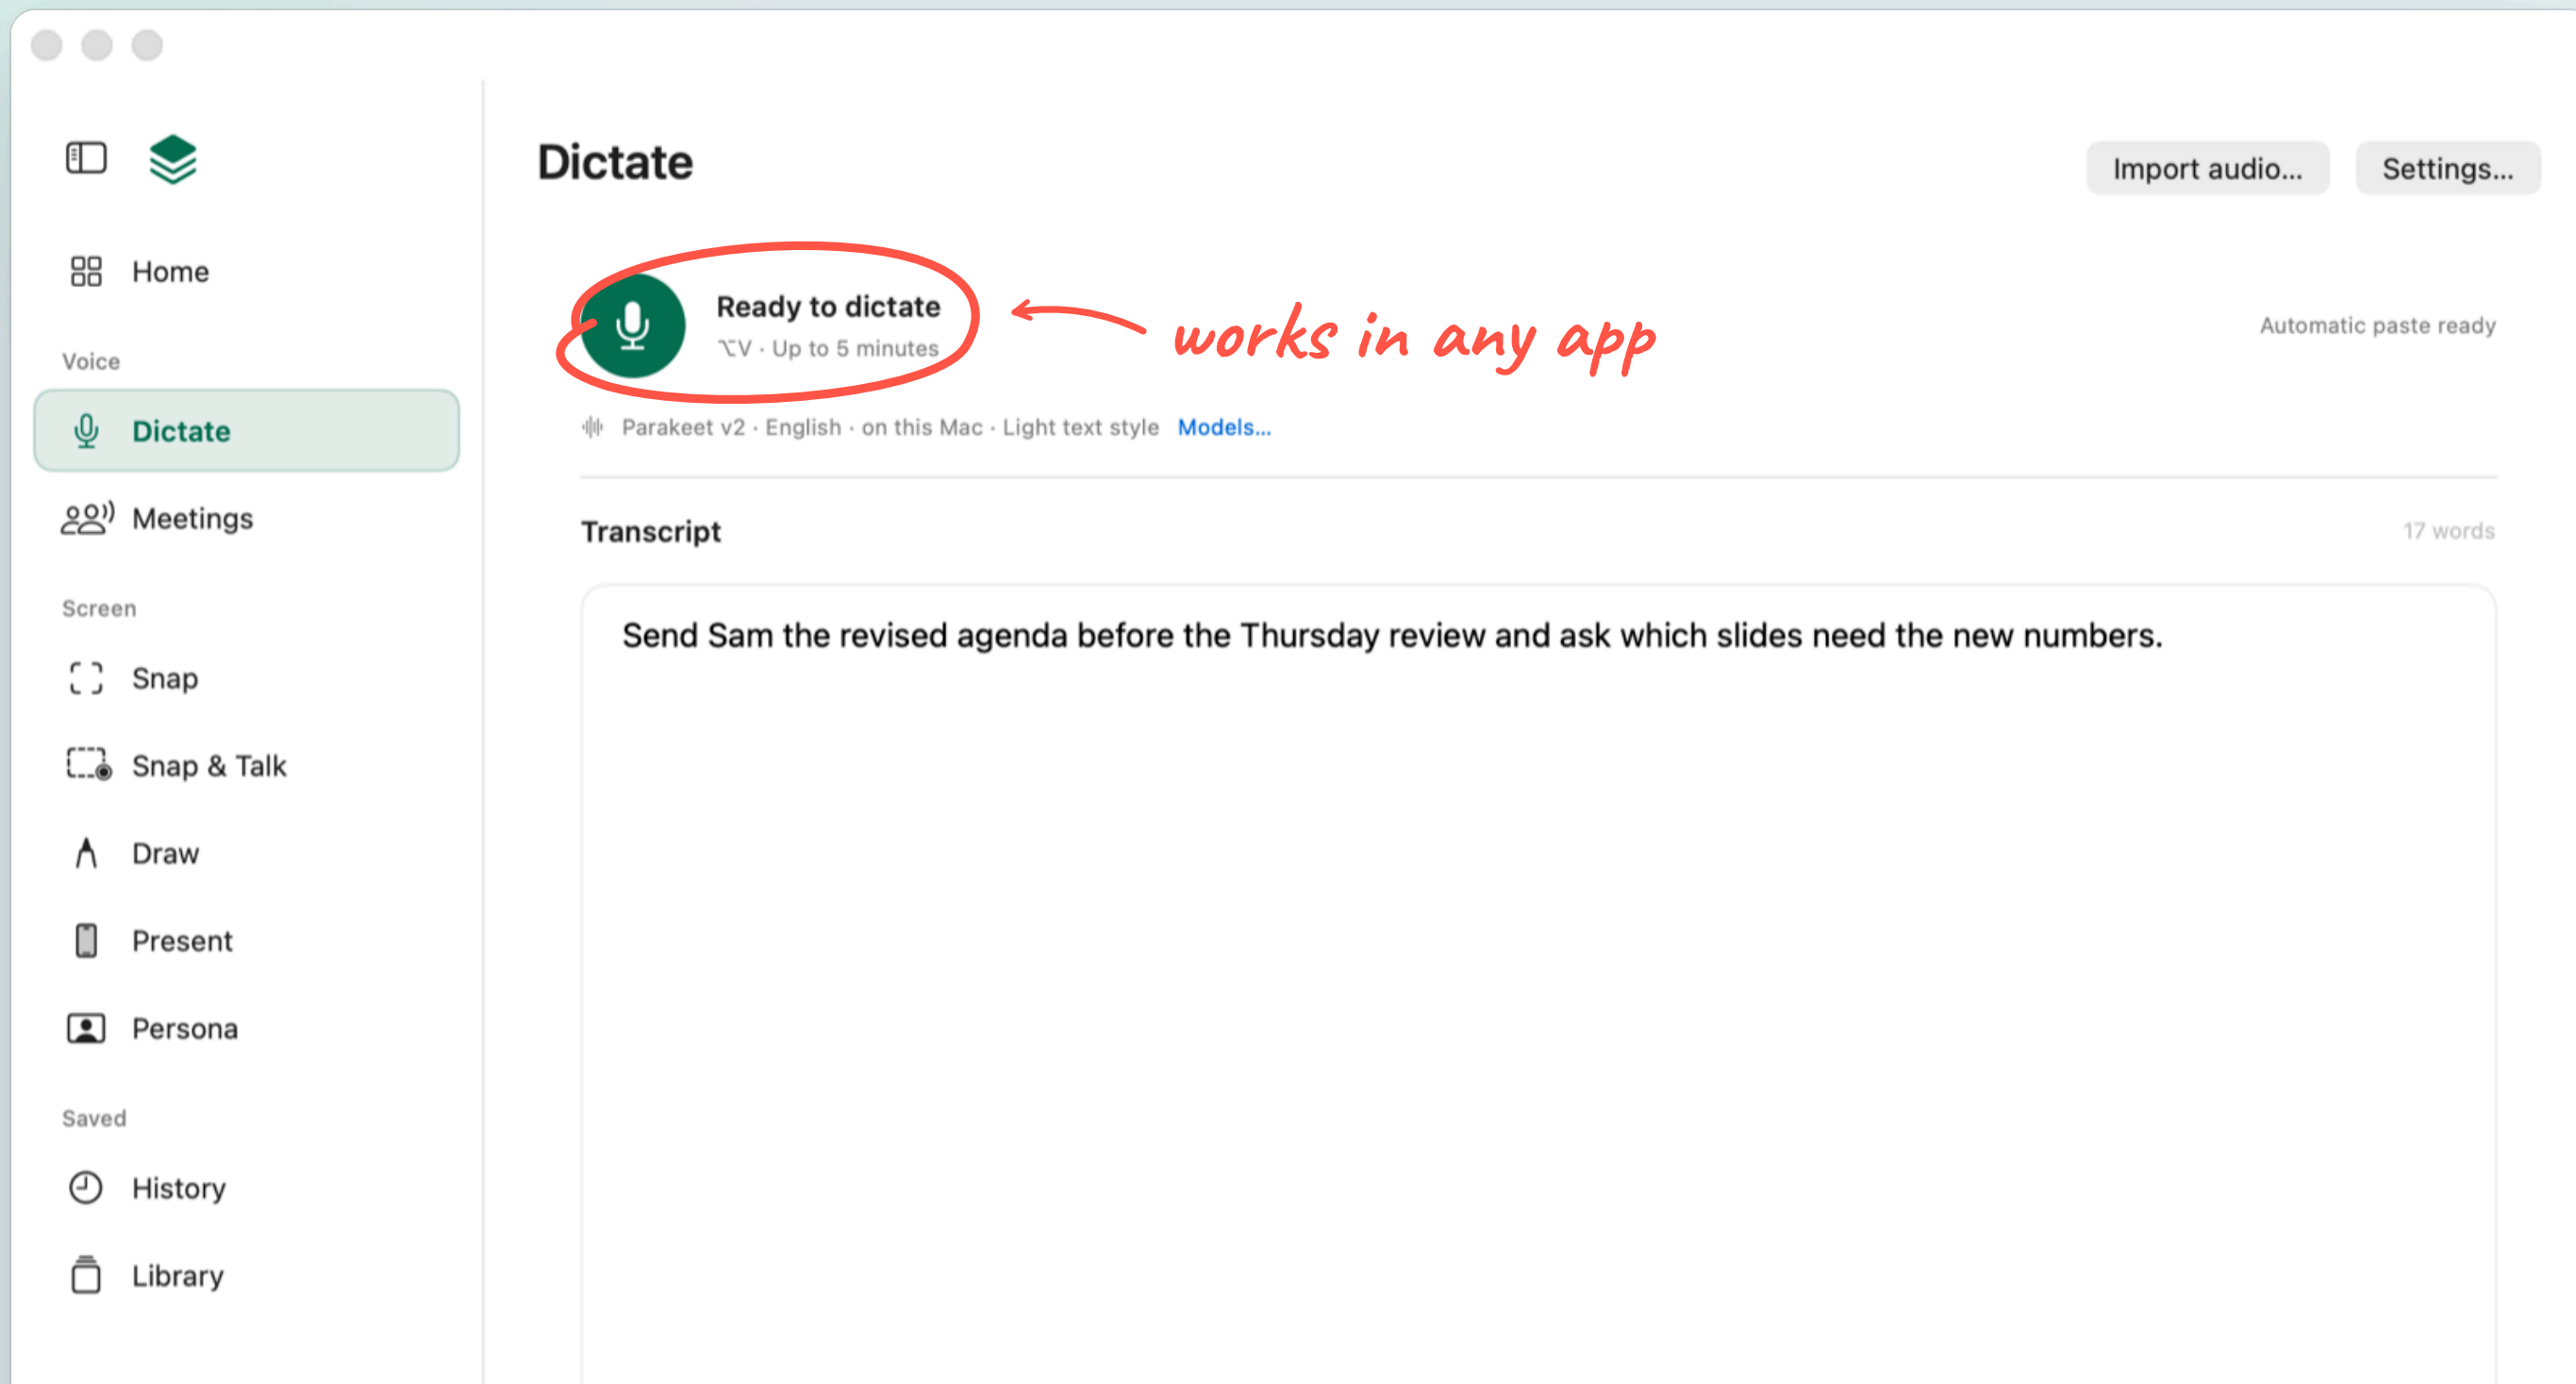

Say it.
Snap it.
Show it.

Workbench puts a set of small tools on top of every app on your Mac.

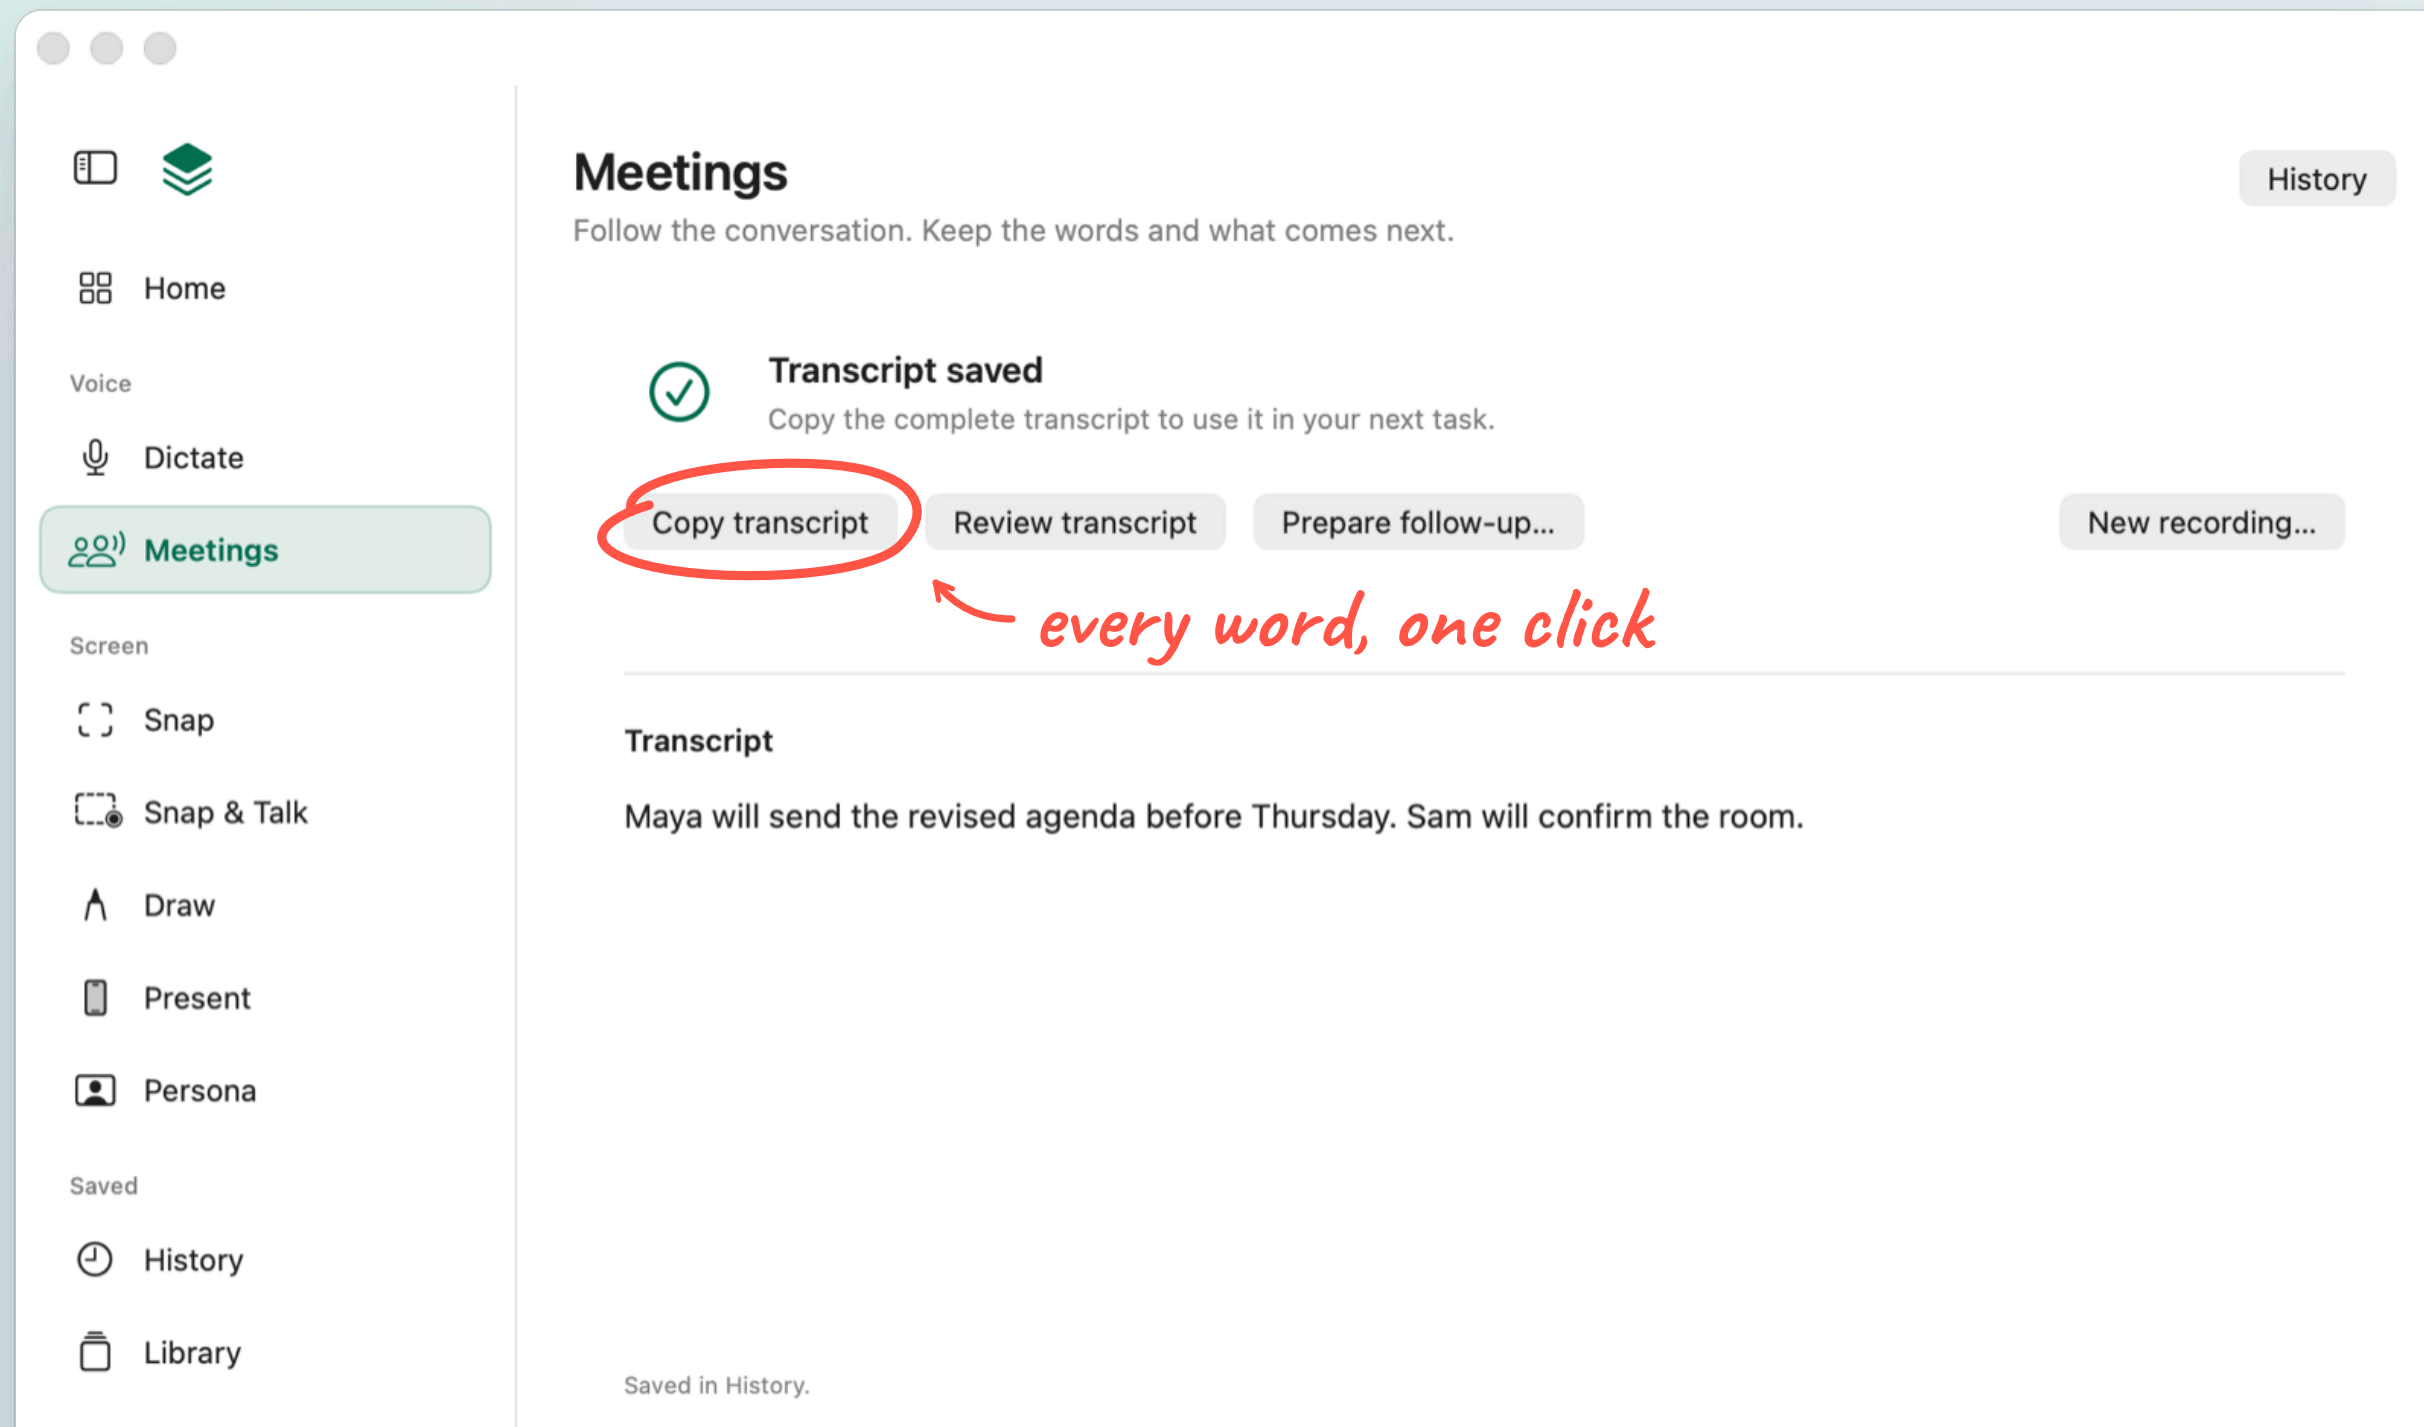

Talk, and it types where you are.

Press **⌘V** in any text field. Your words land where you were typing, and a copy waits in History.

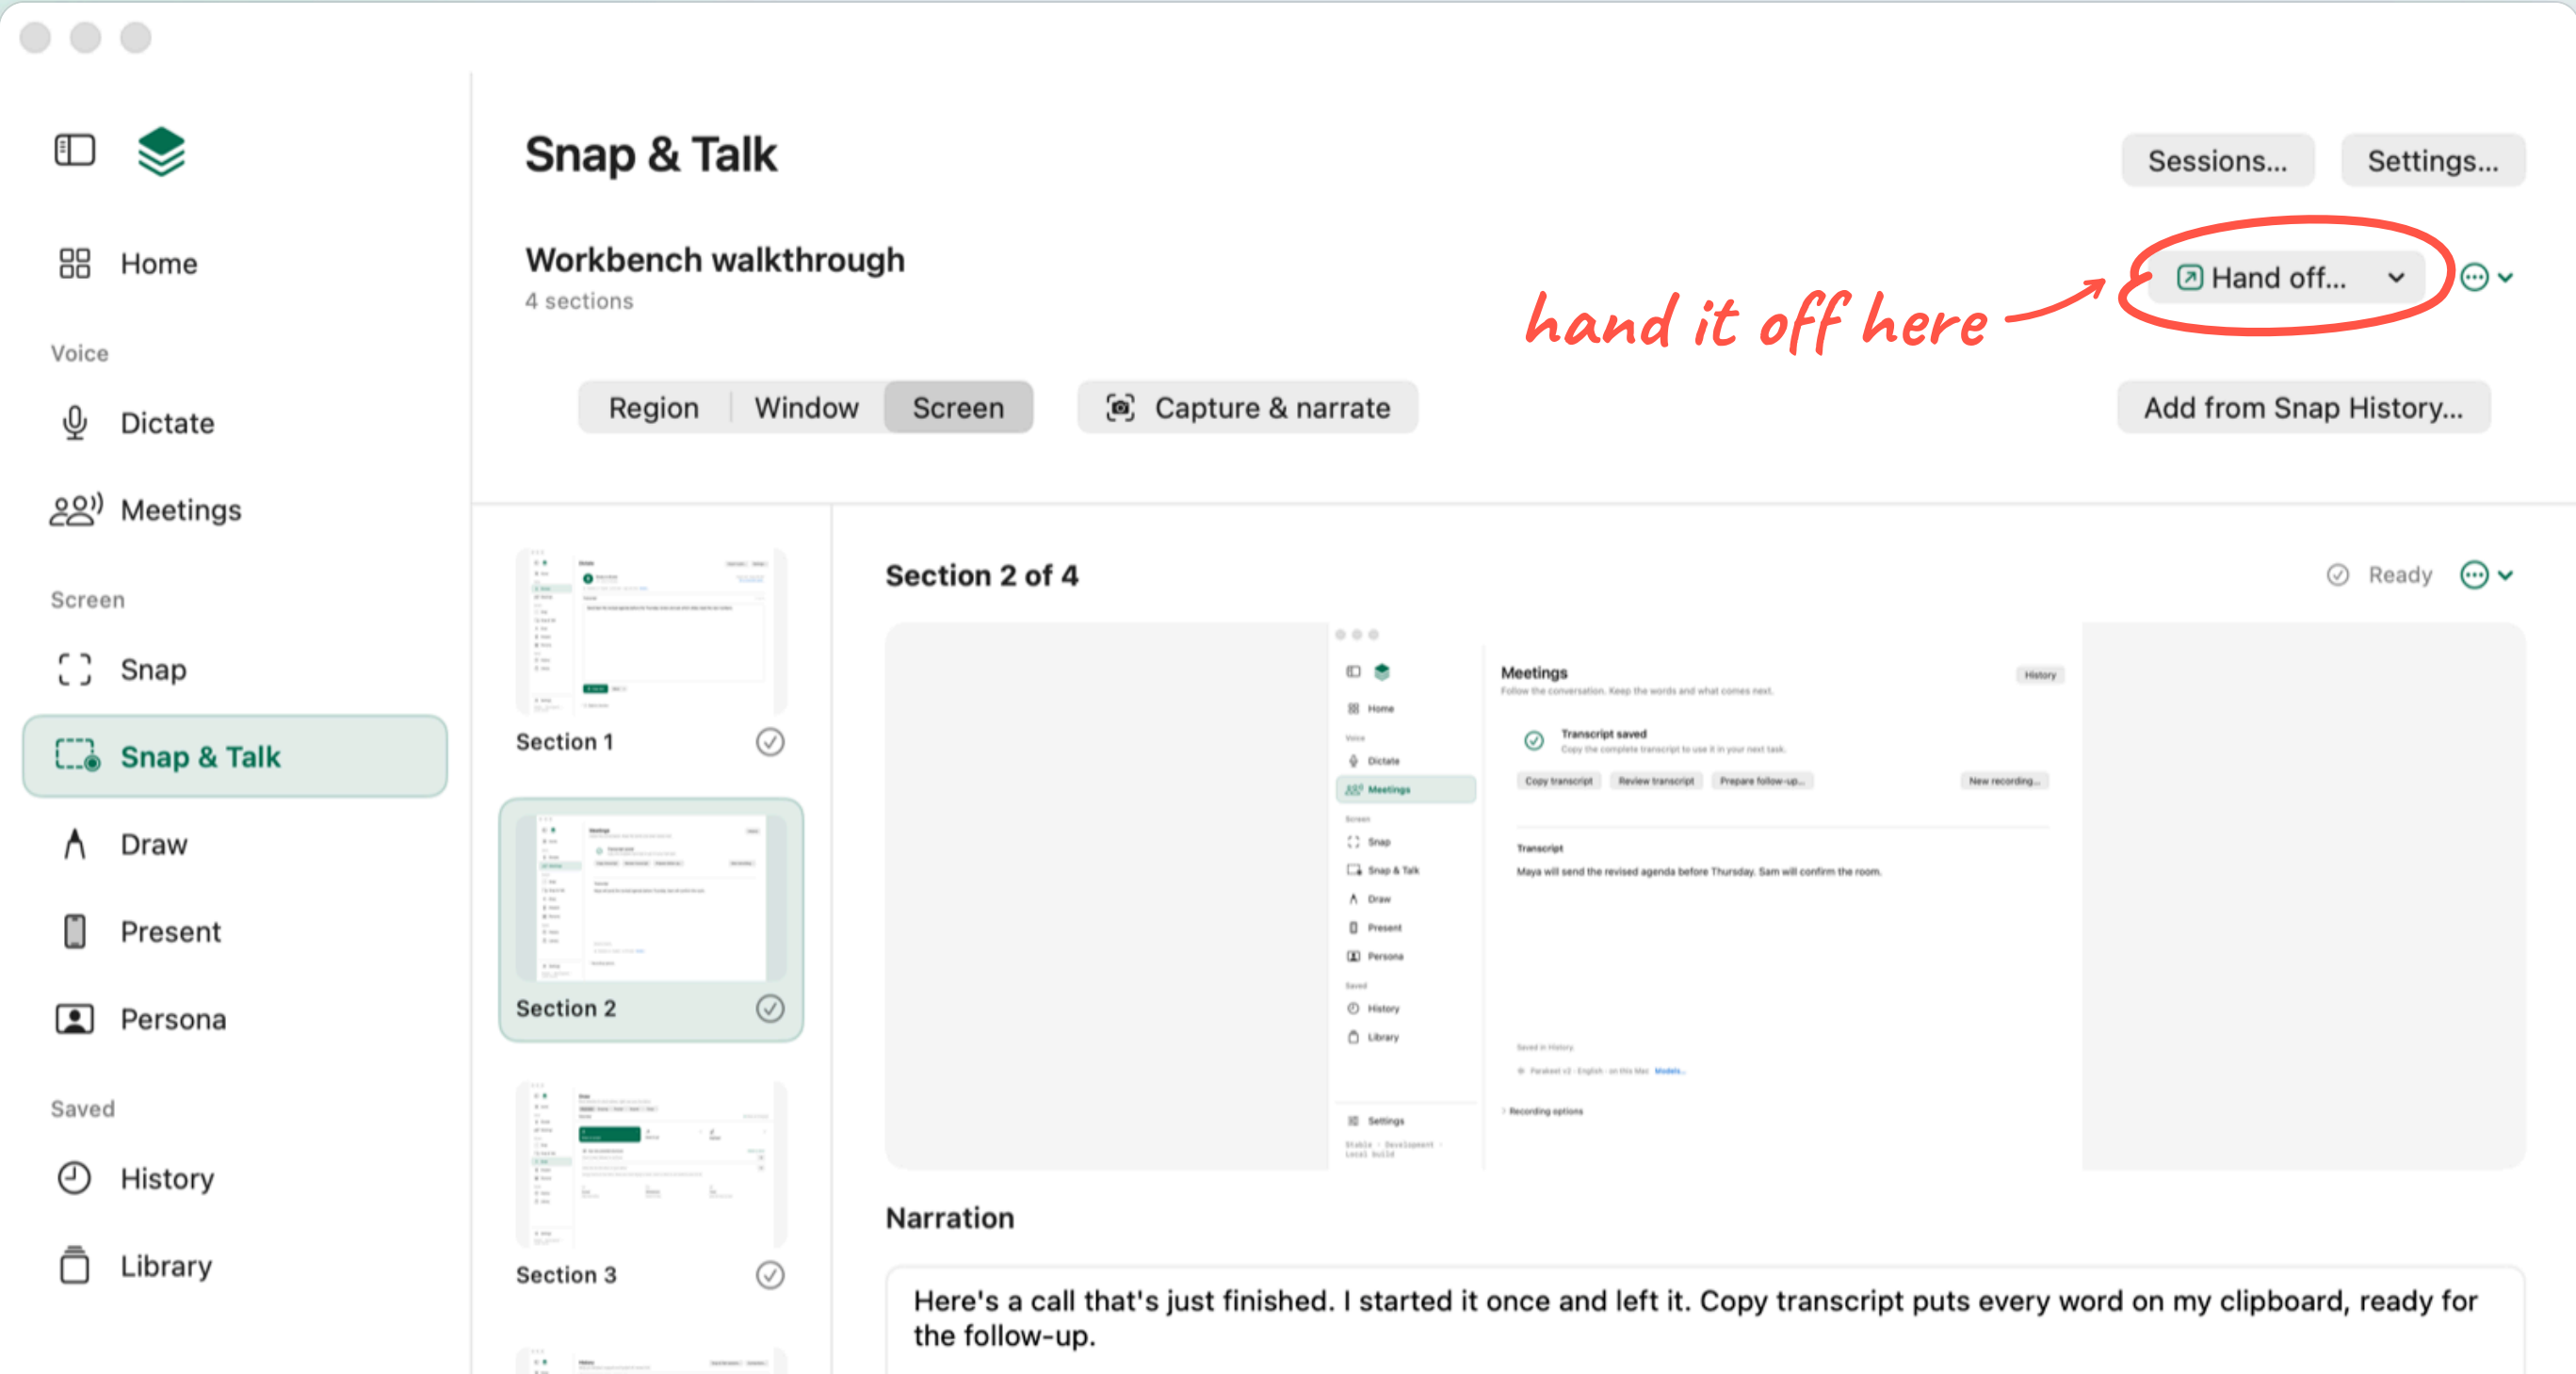

Leave every call with the words.

Start once when the call begins.
Copy transcript puts every word on
your clipboard.

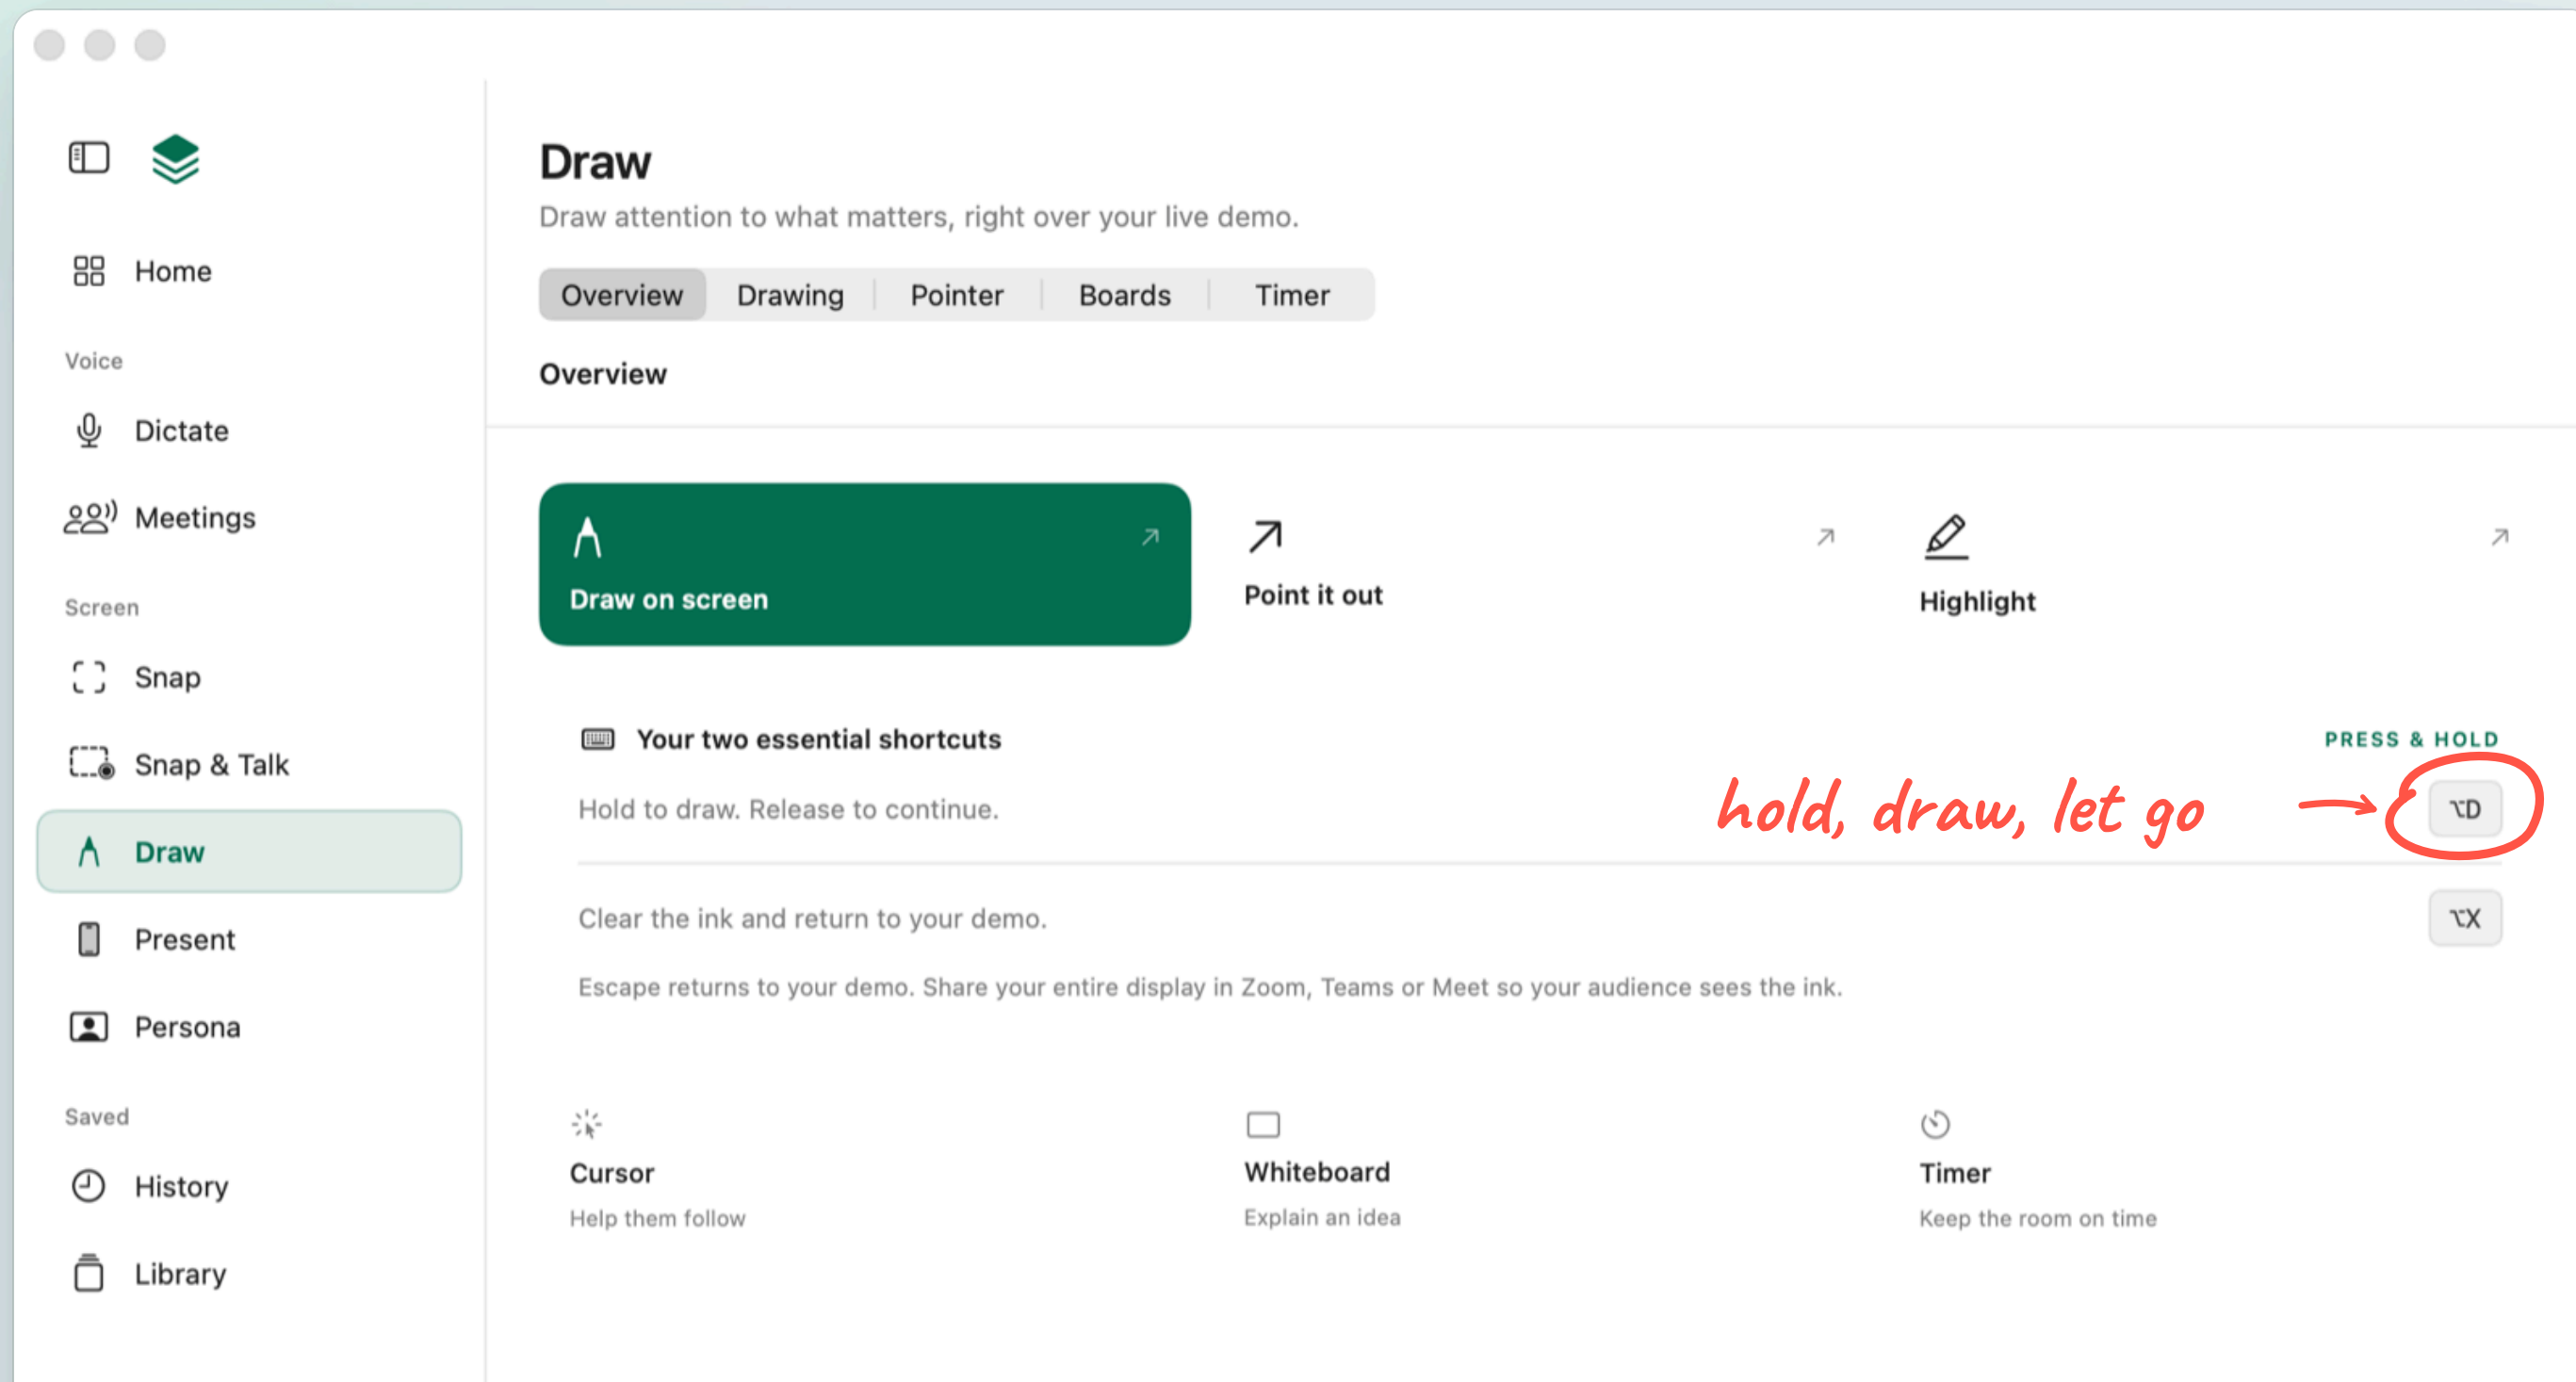

Snap a few screens. Talk. Get a deck.

Snap each screen and say what matters. Hand it off, and an assistant builds the deck.

Mark it up mid-demo.

Hold **⌘D** and draw over anything. Let go to carry on; **⌘X** clears.

Nothing gets lost.

Every dictation, meeting, Snap and result stays on this Mac, searchable, newest first.
